

Montana's Major Wind Projects (2008)

Sites In Operation

* In addition, Montana has nearly 100 small (5 MW or less) wind installations around the state, with a combined capacity that is approaching 5 MW. Note that while MEIC strongly supports additional renewable energy development in Montana, MEICs support of specific projects requires a high level of commitment to environmental responsibility (as demonstrated by siting decisions, avian studies, mitigation measures, etc.).

Owner / Project	Location	Size
A. Invenergy	Judith Gap	135 MW (90 x 1.5 MW)
B. Exergy	Great Falls	9 MW (6 x 1.5 MW)
C. MDU	Baker	19.5 MW (13 x 1.5 MW)
TOTAL		163.5 MW *

Active Proposals

Owner / Project	Location	Size
D. Zebuln	Norris Hill	150 MW
E. Montana Marginal	Pondera Co.	104 MW
F. Naturener Phase I	Shelby	103 MW
G. Horizon Phase I	Martinsdale	73 MW
H. Invenergy Phase II	Judith Gap	53 MW
I. Wind Hunter	Valley Co.	50 MW
J. WEST Wind	Reedpoint	50 MW
K. Sagebrush Capital	Norris Hill	20 MW
L. Montana Marginal	Chester	20 MW
M. Coyote Energy	Norris Hill	10 MW
N. Two Dot Wind	Wheatland Co.	10 MW
TOTAL		643 MW
